from food waste

• THE PROBLEM

1 in 3 meals ends in the bin.

Food waste is one of the largest unsolved environmental and economic problems of our time - costing billions, emitting millions of tonnes of CO₂, and squandering the planet's resources daily.

1/3

of all food produced
globally is wasted

FAO

8–10%

of GHG emissions

\$4bn+

annual food waste
cost to Pakistan

FAO/WB

A marketplace for surplus food.

Two-sided platform connecting food businesses to local customers. Sellers monetise waste; buyers discover great food at lower prices.

FOR BUSINESSES (SaaS)

- White-label branded subdomain store
- Surprise Bags & individual item listings
- Real-time order dashboard & analytics
- Staff management with role-based access (RBAC)
- Customer chat & review management

FOR CONSUMERS (Free)

- Browse Surprise Bags & deals near them
- Frictionless OTP checkout - no sign-up
- Native iOS & Android mobile app
- In-app chat with sellers
- Digital receipts & order history

- MARKET OPPORTUNITY

A massive, untapped market.

- **No dominant player**

No food rescue marketplace platform exists in Pakistan. The market is wide open.

- **Pakistan food crisis**

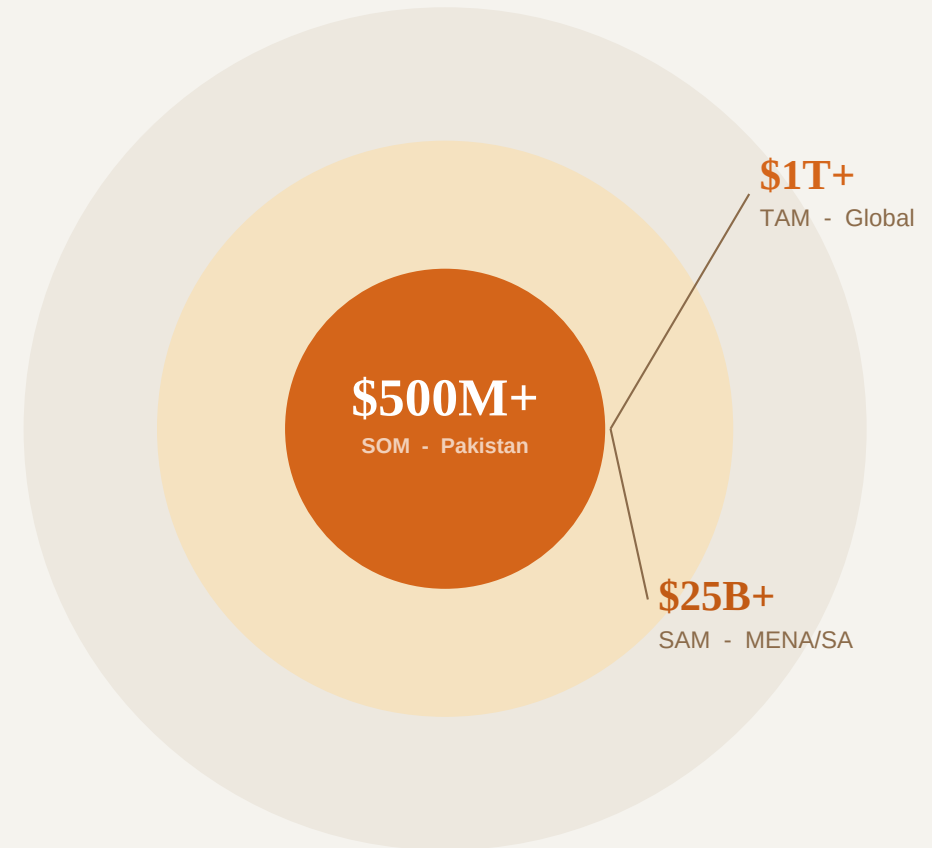

Pakistan loses 40% of food post-harvest - one of the highest waste rates globally (FAO 2023).

- **Growing food sector**

Pakistan food & beverage industry growing 8% YoY, with thousands of outlets needing surplus solutions.

- **Recurring revenue**

B2B SaaS subscription model with low churn and strong network effects.

• BUSINESS MODEL

Multiple revenue streams.

~60% SaaS Subscription

Monthly/annual plans per brand. Tiered by locations, staff seats, and features. PKR 3,000-12,000/mo.

~25% Transaction Fee

Small percentage of each order processed through the platform, charged to the seller.

~15% White-Label Enterprise

Custom subdomain infrastructure for large chains. Annual contracts at premium pricing.

• TRACTION & PRODUCT

Built, tested, ready to scale.

Full-Stack Platform

React web app + React Native mobile (iOS/Android) + REST API - all live.

Multi-Tenant Architecture

Each brand gets an isolated white-label subdomain store (e.g. kfc.grabengo.store).

Real-Time Infrastructure

WebSocket order notifications and live seller-customer chat built-in.

Frictionless Checkout

Email OTP verification - customers order without creating an account.

Geolocation Discovery

GPS-sorted brand and store discovery in the consumer-facing app.

RBAC & Staff Management

Role-based access: SuperAdmin, SellersAdmin, SellersStaff, Customer.

Profit and purpose.

Every order on Grabengo is a measurable environmental action - and a story investors can stand behind.

2.5 kg

• TEAM

Built by Alpha Devs.

A technical founding team with deep experience in marketplace products, full-stack development, and a genuine mission to tackle food waste.

01 Full-Stack Capability

React, Node.js, React Native, WebSockets, AWS S3 - all built in-house with production-ready architecture.

02 Product Thinking

Grabengo ships with multi-tenant subdomains, RBAC, real-time WebSockets, OTP checkout, and geolocation - on day one.

03 Mission-Driven

We believe reducing food waste is one of the highest-impact things technology can do for the planet right now.

04 Built to Scale

Multi-tenant architecture designed for thousands of brands from day one. No costly re-architecting needed.

The path to scale.

Phase 1 · Q1–Q2 2025

Launch

CURRENT

- Onboard first 50 seller brands
- Pakistan - Karachi & Lahore
- App live on iOS & Android stores

Phase 2 · Q3–Q4 2025

Growth

- Expand to 5 Pakistan cities
- Premium SaaS tiers launch
- Supermarket chain partnerships

Phase 3 · 2026

Scale

- Regional expansion (UAE, BD)
- Enterprise white-label contracts
- Third-party API marketplace

Join us in solving one of the world's biggest problems.
